

Pocket Guide

NIOSH Pocket Guide to Chemical Hazards, Palm OS® Edition

[No longer available - web page remains for historical reference]

Quick and easy access to chemical hazard information — at your fingertips, specially formatted and hyperlinked for small handheld displays such as the Handspring Visor®, Palm® Pilot, III, IIIx, V, Vx, VII, and VIIx. Provided in Isilo document format. An invaluable reference! The printed guide is a popular reference among industrial hygiene and safety professionals. Now you can carry it in your handheld device! Only occupies 1.1 MB RAM.

The Pocket Guide features:

- Extensive list of chemical names and synonyms for 677 unique industrially-used substances
- CAS and RTECS reference numbers
- Department of Transportation (DOT) identification and guide numbers
- Recommended Exposure Limits (RELs) established by NIOSH
- Occupational Exposure Limits (OELs) promulgated by OSHA
- Immediately Dangerous to Life and Health (IDLH) values
- Physical properties
- Incompatibilities and reactivities
- Measurement method description
- Personal protection and sanitation
- General first aid procedures
- Respirator recommendations
- Routes of exposure
- Symptoms of exposure
- Target organs

(The Isilo document reader, version 2.53 or later, is required.) Please see the “readme” file for additional information.
